

## 2009 Biennial Legal Bridge Inspections

### Unified Government of Wyandotte County / Kansas City, Kansas

**DRG** is currently under contract with the Unified Government of Wyandotte County/Kansas City, KS to perform bridge inspections that are part of the overall bridge management plan that has been developed encompassing all the bridge structures within the county. The primary purpose of this management plan is to provide an easily accessible database which will address inspection, evaluation and rating, maintenance and replacement concerns. Through their bridge management plan, the UG is capable of reviewing and comparing information specific to any individual bridge structure, or accessing summary tables that allow comparison between specified groups of bridges.

The program developed covers all bridge structures, legal and non-legal, owned and maintained by the UG and vary in size, age and type. The scope of the project is designed to meet the immediate requirements of the UG, the Kansas Department of Transportation (KDOT), and the Federal Highway Administration (FHWA). Additionally this program addresses the long-term planning requirements for maintenance and repair, as well as developing a programming schedule for structures requiring replacement.
