

Procurement Consulting Service Kansas City, Missouri

City of Kansas City, Missouri

In 2007 the City of Kansas City, Missouri selected **DRG** as their consultant for assistance in procuring the services of an Energy Service Company (ESCO). This was the second time DRG had been selected for these services with the City.

DRG's scope of work on this contract was to provide professional consulting services to advise and assist the City of Kansas City, Missouri with the selection of an Energy Services Company (ESCO) that would identify and implement energy conservation measures with the intent to reduce the energy and operational cost for City-owned facilities. ***The City owns and operates over 170 facilities; therefore the potential scope of the ESCO contract was very large with a total amount estimated to be between 10 and 20 million dollars.***

A water impact fee structure and ordinance was produced for the City, which allowed the City to collect revenue to address growth related improvements in the system. A new water rate study was also conducted by the study team.
