

# Route 60 Republic, Missouri

Missouri Department of Transportation

**DRG** provided plan development for this 2.5-mile urban roadway improvement within the City of Republic, Missouri for MoDOT.

The project included roadway widening from three lanes to five lanes, mill and overlay of the existing lanes of traffic, reconstruction of intersections and entrances, curb and gutters, storm sewers, sidewalks with ADA ramps and period lighting for roadway and pedestrian traffic. Three signalized intersections were also designed and constructed at heavily skewed intersections. This project is located on a heavily traveled roadway through Republic, Missouri's largest business district.
